EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the title of the invention, delete "and bending processing method of the same".

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The closest prior art of record fails to teach or suggest the recited composite panel structure. Independent claims 12, 23 and 29 identify the uniquely distinct feature of a second flat face sheet "having a first end portion adhered to a first end portion of the second major surface of the flat center core member, and a second end portion including a second end terminating short of a second end of the flat center core member, the second end portion of the second flat face sheet not being adhered to the second major surface of the flat center core member." The closest prior art of record, Palfey et al. (U.S. 4,078,959), discloses a composite panel having a second flat face sheet which either singularly or in combination, fail to anticipate or render obvious the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
